# **On-line**

# Six Sigma Black Belt Training and Certification Program

(Evening Session)
(Batch -31)

#### **During**

January 19 - 24, 2026 (Phase-I) - 6 days February 16 - 21, 2026 (Phase-II) - 6 days March 11 - 13 & 16-18, 2026 (Phase-III) - 6 days April 06 - 11, 2026 (Phase-IV) - 6 days

**Total duration: 24 days** 

Everyday class timing : <u>6:00 pm.- 7:30 p.m.</u> & <u>8:00 p.m.- 9:30 p.m.</u> (3 hrs.)

Final Examination (MCQ type): 19 April 2026 (Sunday), during 7:00 p.m. – 8:30 p.m. (IST)

Last date of registration: 12 January 2026 (Monday)

# **Conducted by**

#### SQC & OR Unit, Mumbai Indian Statistical Institute

Room No. 320, 3rd Floor Old C G O Building, 101 Maharshi Karve Road, Mumbai 400 020.

Tel No.022-22014588 (O), Email: info@isimum.ac.in

<u>www.isimum.ac.in</u>

Mobile: 9969928144 / 9869242240

## **Benefits of attending this program:**

This training program aims to equip participants with comprehensive knowledge of Six Sigma methodology, enabling them to:

- **Identify quality-related issues** in manufacturing and service processes within their organizations.
- **Establish clear linkages** between quality problems and the associated processes, products (or services), and people.
- Recognize Critical-to-Quality (CTQ) characteristics that impact customer satisfaction and business performance.
- Apply the DMAIC (Define–Measure–Analyze–Improve–Control) methodology effectively for real-world process improvement initiatives.
- Conduct graphical and statistical analyses to derive actionable insights from process data.
- **Interpret key statistical metrics and measures** to understand process behavior and performance.
- **Utilize statistical tools and software** such as RStudio, Minitab, and Microsoft Excel for efficient data analysis.
- Gain awareness of commercial software tools commonly used in Six Sigma implementations and how they enhance analysis and decisionmaking.
- Identify and lead impactful process improvement projects that contribute significantly to the organization's bottom line.

# <u>Program Delivery: Six Sigma Black Belt (BB) Training and Certification</u>

The SQC & OR Unit, Mumbai is pleased to offer this online classroom-style Six Sigma Black Belt (BB) training and certification program through a virtual platform.

#### **Program Highlights:**

- All training sessions and the final examination will be conducted entirely online.
- Training material (PDF format) and datasets for class exercises will be shared via a virtual drive.
- Participants are expected to download the materials and datasets before attending the sessions.

#### **Tools for Data Analysis:**

- The training will primarily involve hands-on data analysis using:
  - RStudio
  - Minitab
  - Microsoft Excel

#### **Software Requirements:**

- Participants may:
  - o Purchase a Minitab license, or
  - Download the free 15-day trial version.
- Those opting for the trial version of Minitab are requested to install it during the session, as guided by the instructor.

#### **About the Online Sessions:**

The training program will be conducted via **Microsoft Teams** as the online platform.

#### **Platform Access Requirements:**

- Participants must register on Microsoft Teams using the same email ID provided in their nomination form.
- To sign up or download Microsoft Teams, please visit: <a href="https://www.microsoft.com/en-in/microsoft-365/microsoft-teams/group-chat-software">https://www.microsoft.com/en-in/microsoft-365/microsoft-teams/group-chat-software</a>

#### **Getting Started with Microsoft Teams:**

Participants unfamiliar with Microsoft Teams are encouraged to watch the following tutorial videos for guidance on creating an account and joining a session:

https://www.youtube.com/watch?v=oq\_6-TJkGBA https://www.youtube.com/watch?v=BH6bSlwR0-4

# **Target Participants:**

Heads of Strategic business units, Managers/ Executives from various functions with a minimum of six months specialized training in the area of Quality Management of certified Six Sigma Green Belts, can attend the current Six Sigma Certification Program.

#### **Faculties:**

Experienced faculties from Indian Statistical Institute, having in-depth experience in implementing six sigma in various leading manufacturing and service organizations across the globe, will be associated with the training sessions.

#### **Program Phases:**

- Phase I: January 14 24, 2026 (6 days)
  Phase II: February 16 21, 2026 (6 days)
  Phase III: March 11 13 & 16-18, 2026 (6 days)
- **Phase IV**: April 06 11, 2026 (6 days)

#### Session Schedule (IST):

06:00 PM - 07:30 PM | Session 1
 07:30 PM - 08:00 PM | Break
 08:00 PM - 09:30 PM | Session 2

#### **Examination Details:**

- Date: April 19, 2026 (Sunday)
- Time: 7:00 PM 8:30 PM (IST)
- Format: Online Examination (1.5 hours)
- Type: Multiple-Choice Questions (MCQs)
- Passing Criteria: Minimum 60% required to pass

In addition to the MCQ test, all participants are **required to submit assignments** that will be provided during the sessions. Both components are **mandatory** for successful completion of the program.

# Six Sigma Black Belt Certification Criteria

To be eligible for the Six Sigma Black Belt certification, participants must fulfill all of the following requirements:

- 1. Attend all training sessions
- 2. Score a minimum of 60% in the MCQ-based Qualifying Examination
- 3. Submit all assigned coursework and assignments
- 4. Complete one real-time project applying the Six Sigma methodology\*

\*The project should demonstrate practical application of Six Sigma tools and techniques to solve a real-world problem.

**Note:** Participants are required to undertake the project within their parent organization (current workplace). A PowerPoint presentation (PPT) of the completed project must be submitted within six months from the last date of training.

### **Registration:**

Registrations are purely on a 'first come, first allotted' basis. Admissions may close early if all seats are filled. For any clarification or enquiry, participants may call 9969928144 / 9869242240.

Participants are required to pay the course fee **before registration**. After making the payment, please complete the online registration through the "**Register Now**" option available on the home page of our website: <a href="https://www.isimum.ac.in">www.isimum.ac.in</a>

After completing the registration, participants must send an email to **sqcbombay@gmail.com** mentioning their **name**, **current postal address** (for sending the course material), and **payment details**.

#### Course fee:

Rs. 50000 + 18 % Tax as per Govt. Rules. Total fees: **Rs.59000** /- per participant. Fees to be paid **through on-line bank transfer only**. The bank details for on-line payment are given below:

Bank Name: STATE BANK OF INDIA
Account Name: Indian Statistical Institute,

Account Type: Current
Bank Account No: 10996682279

Branch: MUMBAI MAIN BRANCH

Bank Address: Mumbai Samachar Marg, Horniman Circle, Fort. Mumbai 400023

IFSC code: SBIN0000300

**Note:** Fee once paid will be fully refunded if ISI cancels the program only.

**LAST DATE FOR REGISTRATION: January 12, 2026** 

#### **Body of Knowledge: Six Sigma Black Belt Course**

- 1. Overview of Six Sigma Methodology and roles and responsibilities in Six Sigma implementation
- 2. Identification, Prioritization and selection of Improvement opportunities
- Over view of Six Sigma Project execution (DMAIC Define- Measure- Analyze- Improve & Control), and Gate Review Questionnaire
- 4. Development of Project Team and Charter
- 5. Define and Map Processes to be improved (SIPOC (supplier, input, process, output, customer) / COPIS (customer, output, process, input, supplier), Activity Flow Chart)
- 6. Identification of critical to customer / critical to business characteristics: Voice of Customer
- 7. Descriptive Statistics and Statistical distributions Binomial, Poisson ,Normal and other continuous distributions
- 8. Prioritisation Matrix and FMEA and use of it in Data Collection Planning
- Introduction to various statistical software packages for data display & analysis like Excel, Minitab, Systat,
   JMP, crystal ball, etc.- understanding in usage & interpretation of output along with each topic
- 10. Measurement System Evaluation (Gauge R&R) for variables as well as for attribute measurements (Kappa Value and Confidence interval for agreement with expert)
- 11. Understanding variation-special causes vs. common causes (Application of Graphical techniques)
- 12. Stratification methods (like Pareto, Bar Diagrams, stratified dot plot, stratified scatter plot, Box Plot, Multi -Vari Charts etc)
- 13. Normality test of a data, evaluation of Process Capability for data from a Normal/Non-Normal distribution
- 14. Evaluation of Process Capability for Data from Normal/Non-Normal Distribution
- 15. Concept of Short Term, Long Term Process Capability and assessment of Sigma level
- 16. Cross Functional Process Mapping including identification of value added and non value added activities
- 17. Organizing for potential causes using cause and effect diagram, FMEA & Tree Diagram
- 18. Concept of correlation and Regression and use of the same in validating causes
- 19. Concept of Test of Hypothesis like 2 Sample t,  $\chi^2$ , ANOVA etc and use of the same in validating the causes
- 20. Sample Size determination for a given confidence level
- 21. Multiple Regression, logistic regression and use of the same in validating the causes
- 22. Concept of Design of experiment and details of full factorial, fractional factorial and screening designs
- 23. Generate Improvement Ideas using Creativity Techniques (Traditional & non traditional)
- 24. Solution Evaluation Criteria, Evaluation of solutions and selection of solutions
- 25. Change Management Process dealing with resistance to change and Process of piloting the solutions
- 26. Risk Analysis through use of FMEA or related methodologies
- 27. Concept and Examples of Poke Yoke, Visual Workplace and 5S
- 28. Evaluation of results after implementation and monitoring the results through statistical Process Control (like Control Charts, Pre-Control Charts etc)
- 29. Monitoring the results as a part of established QMS through use of process, product audit and internal audits
- 30. Institutionalization and integration of the solutions
- 31. Work through at least 3 six sigma projects of different applications
